C Programming Assignment – Question 2

2. Online Examination System

Question

An online examination system allows a student to submit an exam when the student has answered at least one question and the remaining time is greater than zero. If the exam has already been submitted, another submission should not be allowed.

Sample Input

```
Questions Answered: 45
Remaining Time: 12
Already Submitted: 0
```

Sample Output

```
Submission Allowed
```

C Program

```c
#include <stdio.h>

int main(void) {
    int questionsAnswered, remainingTime, alreadySubmitted;

    printf("Enter questions answered: ");
    scanf("%d", &questionsAnswered);

    printf("Enter remaining time: ");
    scanf("%d", &remainingTime);

    printf("Already submitted? (1 = Yes, 0 = No): ");
    scanf("%d", &alreadySubmitted);

    if (questionsAnswered >= 1 &&
        remainingTime > 0 &&
        alreadySubmitted == 0) {
        printf("Submission Allowed\n");
    } else {
        printf("Submission Not Allowed\n");
    }

    return 0;
}
```

Explanation

1. Read the number of questions answered, remaining time, and submission status.

2. Check that at least one question is answered.

3. Check that remaining time is greater than zero.

4. Check that the exam has not already been submitted.

5. Allow submission only if all three conditions are true.

Note

Use 0 for not submitted and 1 for already submitted.
